

Motorcycle # _____

TECH SHEET MOTORCYCLES

These technical specifications are intended as a guide and are in no way a guarantee against any harm to spectators, entrants or others. No expressed or implied warranty of safety shall result from the issuance of, or compliance with these technical specifications. You are reminded that all motor sports are dangerous and that the safety of yourself, your family, your friends and your motorcycle are your sole responsibility. I have inspected my motorcycle and will re-inspect my motorcycle prior (12 hours or less) to the running of my motorcycle in this event. I have inspected all that is listed on this form and take full responsibility for its condition on the track. I am also aware that a technical inspection will be performed at the event. By signing here, I certify that the bike is in safe operating condition for racing and participating in track events. I recognize and assume all risk of damage, injury and death that may be caused by a failure of any component of the car, including without limitation the items listed on the tech sheet. I have not relied on the list to be comprehensive or tailored to my bike; it is instead a guideline. I am responsible for ensuring that my motorcycle is in safe operating condition before each and every event in which I am a participant. I release Nature Island Riders and Onlydominican, its sponsors, shareholders, affiliates and all persons and companies that have or might assist in the process of inspecting my bike (collectively, "Released Persons") from all liability of any kind for any property damage, personal injury or death that may occur to me or any occupant of my motorcycle as a result of any of their acts or omissions, expressly including any negligent acts or omissions by the Released Persons. I understand that all forms of motor sports are dangerous and can kill me, I am an adult and accept all of these risks and agree not to join the litigious ranks of persons who believe all injury must be the result of fault by a person with money. This release is in addition to and cumulative of all releases I have given in conjunction with my entry and participation in a Catch Me If You Can.

Are you running on Methanol? _____ **Are you Running on Nitrous?** _____

Complete Class Description (Note: Motorcycles allowed to go 7 mph over the tech/top speed for their class. This is important for determining proper tires.)

INSTRUCTIONS TO INSPECTOR: In the line next to each item, insert either yes (Y) or no (N). If you place a no (N) next to an item, please elaborate on the condition you found in the comments section or attach a piece of paper. The rider of the motorcycle will be responsible for addressing/correcting the items with a no (N) next to it. The rider will have to note in the comments section or piece of paper of how and when the item was corrected and be prepared to have the correction visually verified.

Riders must fill out all items listed on the next page. Tech will then sign off after they have inspected the motorcycle.

<p>WHEELS AND TIRES</p> <p>_____ Tires in good condition for running at or above 130mph.</p> <p>_____ Wear indicators are above minimum spec, meets speed rating for tech/top speed of class.</p> <p>_____ No cracks on wheels.</p> <p>_____ Tires inflated according to manufacture recommendations.</p> <p>_____ Proper wheel alignment.</p> <p>_____ Front Axle tight (safety wired) or pinch bolts treated with thread locker compound.</p> <p>_____ Rear Axle Nut pinned, clipped, or safety wired.</p>	<p>HANDLEBARS AND CONTROLS</p> <p>_____ Handlebars shall permit the front wheel to be turned 20 degrees to each side from the straight-ahead position.</p> <p>_____ Hand control levers must not have sharp or pointed ends.</p> <p>_____ All controls in good operating condition.</p> <p>_____ Throttles = self-closing.</p> <p>_____ Operating kill switch or button accessible to the rider.</p> <p>_____ Steering damper present and mounted correctly.</p> <p>_____ Lanyard style kill switch attached to rider that kills all power.</p>
